Clean Rooms – DISC Facility, Zephyr Building

We have four 36 sqm ISO 7 Clean Rooms available for hire – all fully equipped with standard electrical supplies, electro-static discharge tables, and ESD flooring, compressed clean air lines, and wi-fi. Clean rooms are available to rent for periods of as little as a month (subject to availability).

The Clean Rooms are located within the Zephyr Building: a 1150 sqm facility, which provides access to equipment and expertise to help UK companies accelerate the development of new products and services. A vibration table, thermal vacuum chamber and environmental chamber are located within the clean room area so that testing can be carried out without leaving the clean environment.

“ Whether you are a start-up, SME, or prime in the UK space industry, we have the expertise, experience, and technology to help you bring your ideas to life quickly and efficiently. Contact us to learn more about how we can support you in prototyping and development. ”
